The BioIndustry Association (BIA) is the voice of the innovative life sciences and biotech industry, enabling and connecting the UK ecosystem so that businesses can start, grow and deliver world-changing innovation.

Join BIA and explore opportunities to **influence, connect and save!**

www.bioindustry.org

Connect

Online and in person with industry leaders

- Connect with peers and inspirational leaders at in person and online networking events
- Absorb the latest thought leadership and best practice with BIA blogs, conferences and webinars
- Advertise jobs and share your news online

BIA Supporters

Join the BIA at www.bioindustry.org  #BIA_UK

Influence

Shape the future of our industry and have your organisation's voice heard

Be part of something bigger:

- Campaign with BIA to build a stronger life sciences ecosystem in the UK
- Join a committee or working group and help shape BIA's policy work

EFFECTIVE

Making the Most of Grassland Reseeding with Roundup

cropsscience.bayer.co.uk/roundup

PROVIDER

Introduction:
Roundup is the most effective and most widely used herbicide in the world. It is a non-selective, systemic herbicide that kills all broadleaf weeds and grasses. Roundup is used in a wide range of crops and situations, including grassland reseedings. Roundup is used to control weeds and grasses that are competing with the desired grass species. Roundup is used to control weeds and grasses that are competing with the desired grass species.

Advantages:
• Broad-spectrum
• Systemic
• Residual activity
• High efficacy

Application:
Roundup is applied as a spray to the foliage of the weeds and grasses. Roundup is applied as a spray to the foliage of the weeds and grasses. Roundup is applied as a spray to the foliage of the weeds and grasses. Roundup is applied as a spray to the foliage of the weeds and grasses.

Benefits:
• High efficacy
• Broad-spectrum
• Systemic
• Residual activity

SILO EXTRA THE NEXT STEP FORWARD FOR SILAGE GROWERS

DKC2684 A high output early/maincrop maize for biogas and livestock production

- High DM yields with early/maincrop maturity for maximum output across a range of environments.
- Flint to flint-dent grain for the best combination of fermentable energy and agronomics.
- High starch content and good cell wall digestibility for the highest metabolisable energy yields.
- Good vigour for rapid and reliable establishment regardless of sowing date.
- Good resistance to root and stalk lodging for reliable performance.

METABOLISABLE ENERGY (ME) YIELD IN 2021 FARM TRIALS

Region	DKC2684 (ME/ha)	Farm Standard (ME/ha)
Shropshire	~140,000	~120,000
Wiltshire	~180,000	~160,000
Yorkshire	~140,000	~130,000

Cell Wall Digestibility*

Dry Matter Yield* 17.8t/ha
Starch Yield* 5.9t/ha
*Average performance from field-scale 2021 trials.

THE #DEKALBDIFFERENCE
Bringing together the world's foremost genetic resource, advanced analytical technologies and artificial intelligence engine for the most rapid progress in sustainable maize silage production.

DEKALB is a registered Trade Mark of the Bayer Group. For further information, including contact details, visit www.cropscience.bayer.co.uk or call 0800 188922. © Bayer CropScience Limited 2021

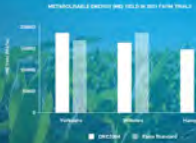

SILO EXTRA THE NEXT STEP FORWARD FOR SILAGE GROWERS

DKC3204 A high output maincrop maize ideal for biogas production

- High DM yields with maincrop maturity for maximum output in a biogas variety spread.
- Flint to flint-dent grain for the best combination of fermentable energy and agronomics.
- High starch content and cell wall digestibility for the highest metabolisable energy yields.
- Very good early vigour for rapid and reliable establishment regardless of sowing date.
- Strong resistance to root and stalk lodging for reliability under challenging conditions.
- Stay green* leaf senescence for the widest top quality harvesting window.

METABOLISABLE ENERGY (ME) YIELD IN 2021 FARM TRIALS

Cell Wall Digestibility*

Dry Matter Yield* 14.7t/ha
Starch Yield* 5.1t/ha
*Average performance from field-scale 2021 trials.

Pre-pregnancy planning, conception & pregnancy

It is well established that the best way to give your unborn child the best start is take good care of the mother. Common sense really, and for the unborn baby we understand the need for folic acid and to give up smoking but there's compelling evidence of the benefits of a wider nutritional consideration as well as high levels of EPA/DHA Omega 3.

Big Shotz' unique approach is a complex multi-vitamin formula delivering 100% of the recommended daily allowance (RDA) of 10 vitamins (E,D3,E and 7 B vitamins) and also beta-carotene, which is a pre-cursor to Vitamin A, beta-carotene allows the body to safely generate as much Vitamin A as it needs.

Most multi-vitamin supplements contain vitamin A in the form of Retinol, which the NHS and most health experts agree should not be taken during pregnancy.

To further ensure Big Shotz delivers optimum benefits during pregnancy we also include a wide range of minerals and other beneficial ingredients while saying no to caffeine, lactose preservatives and other such nasties.

Kids 4-15

The critical formative years of brain development and enhancing cognitive skills is essential to helping your kids achieve their potential and of course lies at the heart of every parent's role.

Improving concentration and focus of the mind through Omega 3 supplementation is scientifically proven but often it's a chore to take tablets and capsules. Big Shotz is a delicious "shot" drink that everyone loves, yet delivers the Omega 3 kids need.

Naturally there's a full range of vitamins & minerals too so in one tasty morning drink they can get the help they need without the stress, fuss and nasty taste of many alternatives.

Health for all

You're interested in staying healthy and go to the gym, do as much exercise as possible and try to eat healthy as often as you can. You know a healthy, happy body and mind means increased performance and satisfaction at work and at home but it's just too difficult to stay the course and our lifestyles often get in the way.

We've found many customers find Big Shotz gives them a real nutrition boost to help offset the shortfalls we face from time to time - not a short term caffeine fuelled energy boost but a properly considered balanced boost that can only come from a full range of vitamins and minerals. ...And of course Omega 3!

55+

As our bodies age we find we may need more help. At our older life stages, it's important to maintain a full and varied diet and wherever possible ensure that all our vitamins level achieve the fully recommended daily rates.

This focus is often associated with the need to avoid Gluten or Caffeine and boost pre-biotic fibre levels. Big Shotz does exactly that plus delivers a huge Omega 3 boost that is believed to aid defence against many of the degenerative diseases.

Furthermore being a liquid the benefits are more readily absorbed, meaning many of the multi and single vitamins pill / tablet regimes can be replaced with a great fresh tasting healthy drink.

Optimised Nutrition...

...For Life

NEW

It's a nutrition revolution

Exciting developments in Everyday Nutrition

- 2 Vibrant modern new packaging
- 2 Delicious new Cranberry & Raspberry Flavours, joins original Mango & Passionfruit
- 2 No artificial flavours, colours or preservatives
- 2 New recipe, 11 vitamins @ 100% RDA, 6 minerals, Pre-biotic fibre and incredible levels of Omega 3
- 2 4 pack and single bottles
- 2 Available from June 2012.

SNEAK PREVIEW
VS30
 HAMBURG
 26 - 27 October 2017

Mercedes-Benz
There's more to this.

SNEAK PREVIEW
VS30
 HAMBURG

We're looking forward to welcoming you to the Mercedes-Benz Sneak Preview of the NEW Sprinter in Hamburg on 26th to 27th October 2017.

The following information tells you all you need to know about the event and what to expect when you're there.

Itinerary

Day One: Thursday 26 October 2017

- 06.00hrs Please check in at the Hilton Airways check-in desks at Terminal 5, London Heathrow Airport. Please ensure you have your passport and airline ticket ready for inspection. Please make sure that you have checked in online for your outward and return flight before arriving at the airport.
- 07.50hrs Flight BA 944 departs London for Hamburg. Please adjust your watches as Hamburg is 1 hour ahead of UK time.
- 09.45hrs Flight arrives Hamburg Airport. On arrival in Hamburg you will be met and transferred to Schuppen 52. Your luggage will be taken directly to the hotel and delivered to your room ready for when you arrive later in the evening. Transfer time: approx. 40 minutes.
- 11.00hrs You will arrive at the Schuppen 52 for registration. Dress code: Smart Casual.
- 12.00hrs Lunch at Schuppen 52.
- 13.00hrs The Sprinter Starts! Please joining presentation, followed by a keynote speech and meal of the NEW Sprinter.
- 14.45hrs Refreshment break and a chance to view the NEW Sprinter.
- 16.00hrs Market Place: Sprinter scalability, software optimising productivity, Mercedes PRO services, X-Case (Stain, and Dynamic).
- 19.00hrs Closing.
- 19.50hrs Evening event commences.
- 23.30hrs Evening event concludes.
- 23.50hrs You will be transferred to your hotel by check-in. Transfer time: approx. 15 minutes.
- 25.45hrs You will arrive at Park Hyatt Hamburg Hotel, located in the historic Leaning Tower Building in the heart of the city, the hotel features historic architecture and an unparalleled maritime elegance. Once you have checked in you will be able to settle into your room and enjoy the rest of the evening at leisure.

Day Two: Friday 27 October 2017

- 06.30hrs Breakfast is served from this time at the hotel.
- 08.00hrs Please move your foot in the foyer of the hotel to your transfer to the airport. Transfer time: approx. 20 minutes. Dress code: Casual.
- 08.30hrs You will arrive at Hamburg Airport where you will check in for your flight back to London Heathrow Terminal 5. Please have your passport and flight e-ticket to hand.
- 10.30hrs Your flight BA 945 departs for London Heathrow Airport.
- 11.25hrs Scheduled arrival at London Heathrow. May see with you a pleasant journey home!
